Chapter 1 Installation

Installation procedure

The installation procedure is made up of three steps.
The details of each step are explained below.

Prepare the printer and computer → "1.1 Prepare the printer and computer"

Install the driver package → "1.2 Install the driver package"

Install the printer driver → "1.3 Install the printer driver"

1.1 Prepare the printer and computer

Make sure that the DP-DS620 printer power is off.

Prepare a USB cable. However, do not use the USB cable to connect the printer and computer at this time.

Log in to Windows as an administrator. The following explanation presumes that the operations are carried out with administrator privileges.

CAUTION:

The display settings of the computer must be set as follows. If the settings differ from the following, the printing preferences screen and other items may not fit in the display area.

- Resolution: At least 1280x800
- Size of text and other items (DPI): 100%

1.2 Install the driver package

Insert the included CD into the disc drive.

Open Windows Explorer, and then click the corresponding drive.

(If AutoPlay is enabled, select Open folder to view files using Windows Explorer.)

If AutoPlay is enabled in Windows 8 and 10, a message appears stating "Tap to choose what happens with this disk". Click the message and select "Open folder to view files Windows Explorer")

Select one of the following folders on the included CD. *Select the folder for your usage environment.

Windows 7 ... CD drive:¥¥DP-DS620_Driver¥7

Windows 8 ... CD drive:¥¥DP-DS620_Driver¥8

Windows 10 ... CD drive:¥¥DP-DS620_Driver¥10

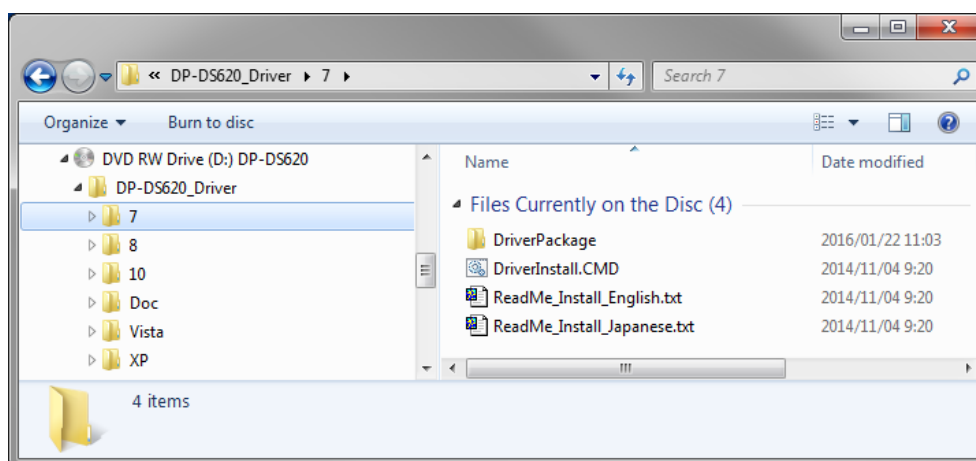

Figure 1.1 Driver Package folder

In the selected folder, double click the following file: DriverInstall.CMD. (Depending on your usage environment, the .CMD extension may not be displayed.)

The driver package installer appropriate for your operating system (32-bit or 64-bit) is selected automatically.

In Windows 8 and 10, this message does not appear. Proceed to page 7.

Figure 1.7 Driver installation message

If you click on this message, the Install driver software screen appears and displays the installation status of the driver. If Close is clicked, this screen closes.

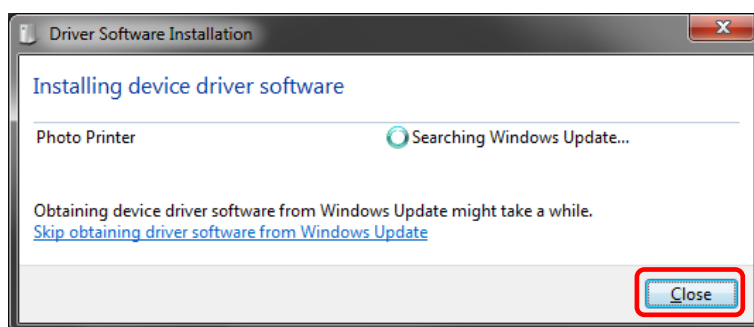

Figure 1.8 Installing the driver software

*About the "Skip obtaining driver software from Windows Update" option

If your operating system is configured to obtain driver software from Windows Update, it may take time for installation to complete because the process searches for drivers from Windows Update first. You can reduce the time until the completion of installation by choosing to skip obtaining driver software from Windows Update. (Depending on your operating system, it may take some time until installation is complete.)

From the Driver Software Installation dialog box, click "Skip obtaining driver software from Windows Update".

Figure 1.9 Option to skip obtaining driver software from Windows Update

A confirmation dialog box appears. Click Yes.

Soon after installation starts, a message appears in the taskbar stating "Your device is ready to use", and then printer driver installation finishes.

Figure 1.11 Installation complete message

If you click on the message, the Driver Software Installation dialog appears, and the "Your device is ready to use" message appears. Click Close.

(If the Driver Software Installation screen is open when installation starts, the abovementioned taskbar message is not displayed.)

This completes installation of the DP-DS620 printer driver.

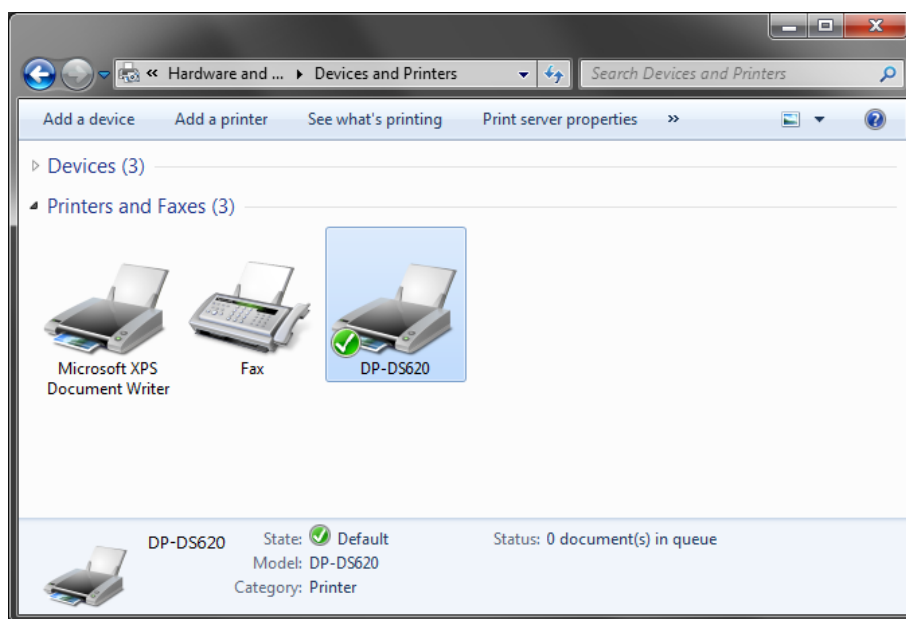

Figure 1.14 Devices and Printers screen

After the installation of the printer driver is complete, always restart the computer.

When it was not possible to install the DP-DS620 printer driver correctly, the following message appears in the taskbar: Device driver software was not successfully installed.

Figure 1.15 Message indicating that the driver was not installed

If you click on this message, the Install driver software screen appears and displays the message "Device driver software was not successfully installed". Click Close.

(If the Driver Software Installation screen is open when installation starts, the abovementioned taskbar message is not displayed.)

When the driver could not be installed correctly, see the next section, 1.4, "Install drivers for unspecified devices", and then install the printer driver.

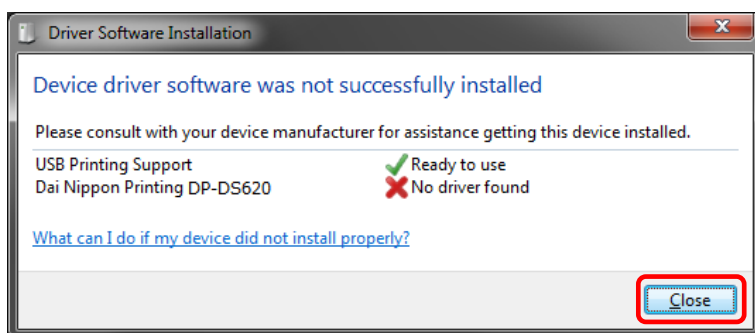

Figure 1.16 When the driver was not installed correctly

1.4 Install drivers for unspecified devices

If you connect a printer that is on to the computer before installing the driver package, a device is created under "Unspecified" in Devices and Printers. In such a case, use the following method to install the printer driver.

Furthermore, use the following method to install the printer driver if you use the standard installation procedure (install the driver package, connect the printer, and then install the printer driver), but the driver is not installed correctly, and a device is created under "Unspecified".

1. Install the driver package

When the driver package has not yet been installed, install it by following the procedure in 1.2, "Install the driver package".

If you install the driver package, installation of the printer driver for the unspecified device completes it automatically.

2. Installing a driver for an unspecified device

In Devices and Printers, under Unspecified, right click on "Photo Printer". From the menu, click "Troubleshoot".

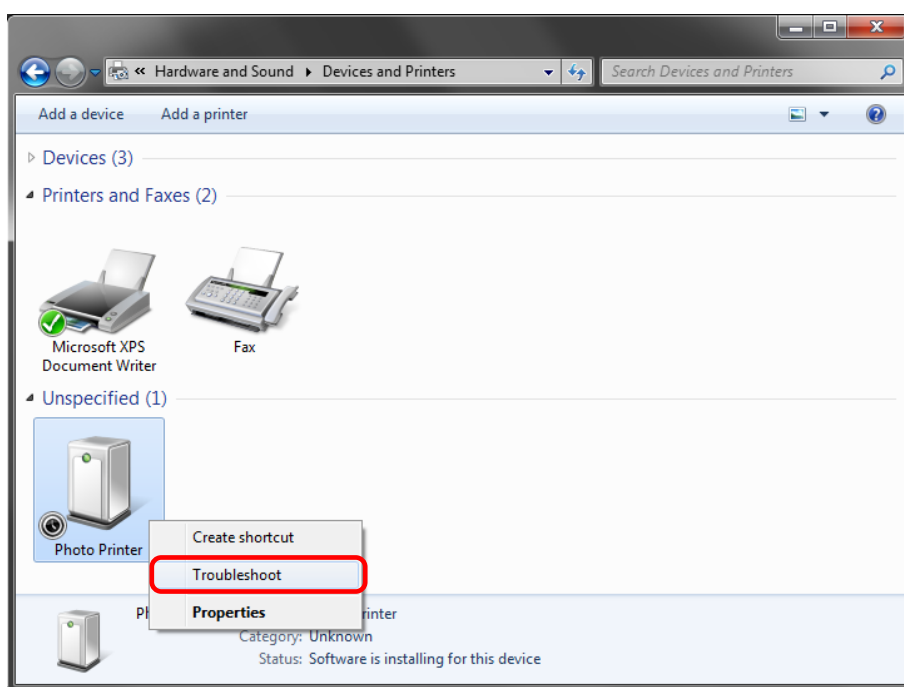

Figure 1.17 Photo Printer under Unspecified

The Install a driver for this device screen appears. Click "Apply this fix".
The computer searches for a driver automatically, and then installs it.

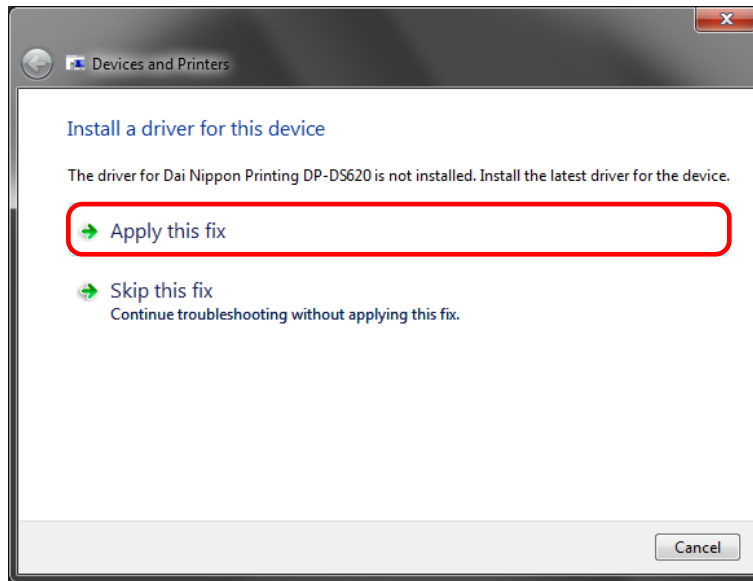

Figure 1.18 Applying a fix

If the driver is installed, the message "Troubleshooting has completed" appears. Click "Close the troubleshooter" to close the troubleshooting window.

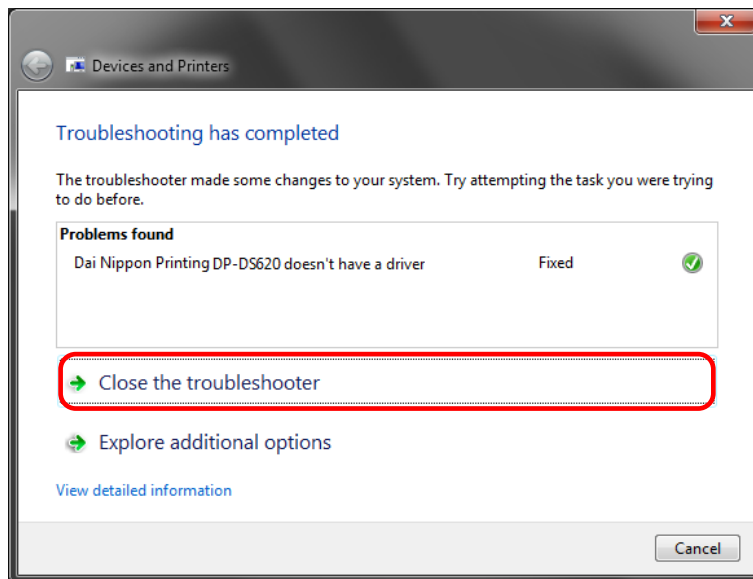

Figure 1.19 Completing troubleshooting

In Devices and Printers, make sure that “DP-DS620” is present.

Note: In Windows 8 and 10, when the printer is offline (the printer is not on and connected), the DP-DS620 icon is not displayed..

This completes installation of the DP-DS620 printer driver.

Paper Size

Specify the paper size. The paper size that can be specified depends on the media size that is loaded in the printer. If the printer is offline, the loaded media size is assumed to be 6x4. Also multiple layout will be automatically used depending on the specified paper size.

For details, see <Multiple layout> described later.

Loaded media size	Specifiable paper size	Multiple layout
6x4(*1,*2)	5x3.5, PR(3.5x5), [6x4] , PR(4x6)	-
5x7(*1)	5x3.5, PR(3.5x5) 5x5, [5x7]	Enable Disable
6x8(*1,*2)	5x3.5, PR(3.5x5), 6x4, PR(4x6) 5x5, 5x7, 6x4.5, 6x6, [6x8] , PR(4.5x6)	Enable Disable
6x9(*2)	5x3.5, PR(3.5x5), 6x4, PR(4x6), 6x4.5, PR(4.5x6) 5x5, 5x7, 6x6, 6x8, [6x9]	Enable Disable

The paper size in square brackets [] is the default paper size for the loaded media.

*1: Paper sizes that cannot be used for printing are grayed out.

*2: For paper sizes that can create margins on the sides of the output results, a warning

Fine Matte	Create printouts with fine grain and strong matte finish. (*2)

*1: Supported by version 01.30 and later.

*2: Supported by version 01.52 and later.

Print Re-try

Specify whether to print data in the printer buffer after a printer error has been cleared.

Print Re-try	Function
Disable	Clear the print data in the printer buffer when a printer error occurs. You must send the cleared print data again after the error is cleared. When you use an application with an error recovery function, select this option.
Enable	Save print data in the printer buffer when an error occurs. The printing process is restarted from the saved data after the error is cleared. Note that if the power is switched off, the data is not saved.

Depending on the content of the printer error, it may be necessary to restart the printer to clear the error. In such cases, the print data in the printer buffer is cleared regardless of the Print Re-try setting.

The following section shows the operation for each Print Re-try setting by error.

Error content	When Print Re-try is disabled	When Print Re-try is enabled
Paper end	You must send the unprinted image data again after the error is cleared.	The printing process is restarted from the data saved in the printer buffer after the error is cleared. When the paper initialization operation is to be carried out, printing occurs afterwards.

*1: After the printer stops due to an error, follow the user's manual of the printer to eliminate the cause of the paper or ribbon error.

2inch cut

Specify whether to cut paper into multiple sheets with a 2-inch length when you use a specified paper size.

2inch cut	Function
Disable	Cut at the normal size.
Enable	Cut at 2-inch lengths so that the 6 x 4 size becomes two sheets and the 6 x 8 size becomes four sheets.

< Multiple layout >

When 5 x 7, 6 x 8 or 6 x 9 media is used, you can use a two-picture layout. You can enable multiple layout settings by setting the paper size of the printer driver. If it sends multiple images from the application, the printer driver allocate them automatically as the multiple layout.

The following section shows the image sizes.

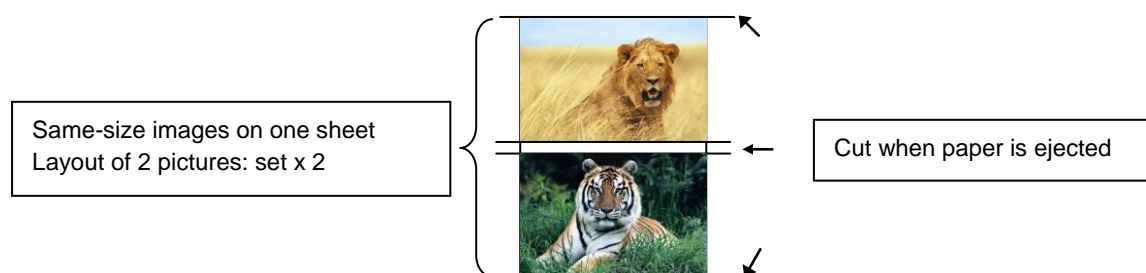

Layout settings

Driver paper size setting	Paper direction	Paper size length x height (mm)	Media used
(5x3.5)	Portrait	(131.1x 92.1)	5x7, 6x8, 6x9
	Landscape	(92.1x131.1)	
PR (3.5x5)	Portrait	(92.1x131.1)	
	Landscape	(131.1x 92.1)	
(6x4)	Portrait	(156.1x105.0)	6x8, 6x9
	Landscape	(105.0x156.1)	
PR (4x6)	Portrait	(105.0x156.1)	
	Landscape	(156.1x105.0)	
(6x4.5)	Portrait	(156.1x117.3)	6x9
	Landscape	(117.3x156.1)	
PR (4.5x6)	Portrait	(117.3x156.1)	
	Landscape	(156.1x117.3)	

Multiple layout is carried out under the following conditions.

1. Set 5 x 7, 6 x 8 or 6 x 9 size media in the printer.
2. Set the paper size of the printer driver to one of the abovementioned paper sizes.
3. From the application, send multiple images.

Note) Depending used conditions, the rewinding print might be carried out instead of the multiple layout. Because they are carried out by the print job, multiple layout are carried out when there are multiple images in a single job.
If you want to layout the same image, send the same number of images as the number-of-sheets setting.
The printer handles two pictures at one time and cuts the paper after it is ejected.

< Rewind Print function >

If you set the paper size setting to (6 x 4) when printing 6 x 4 size to 6 x 8 size media, printing is optimized to reduce consumption of the ribbon. Furthermore, if you set the paper size setting to (5x3.5) or (6x4.5) when printing 5 x 3.5 size to 5 x 7 size media or when printing 6 x 4.5 size to 6 x 9 size media, printing is similarly optimized to reduce consumption of the ribbon.

The above operation applies only to the DP-DS620. When (6x4) is selected with the DP-DS620 (A), printing is performed without rewinding the ribbon. The same applies even if (5x3.5) or (6x4.5) is selected.

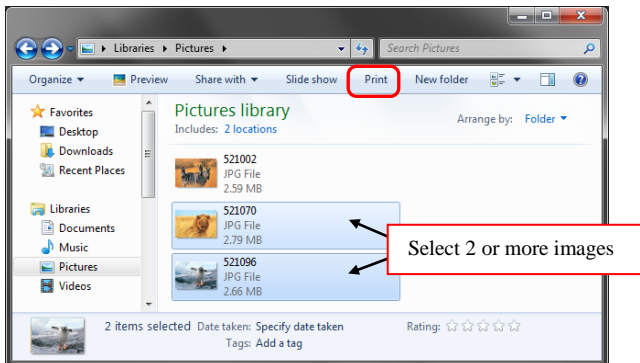

The following shows the difference in ribbon consumption when the paper size is set to (6x4) for 6x8-sized media.

	DP-DS620	DP-DS620 (A)
When printing one sheet at 6 x 4 size once	 <p>*After printing, the ribbon is rewound and adjusted to the next print position.</p>	
When printing one sheet at 6 x 4 size twice	 <p>*After the first sheet is printed, the ribbon is rewound, and the second sheet is printed.</p>	
When printing two sheets at 6 x 4 size once	 <p>*Two sheets are printed at the same time in a multiple layout.</p>	 <p>*Two sheets are printed at the same time in a multiple layout.</p>
When printing one 6 x 4 size sheet once, and then printing two 6 x 4 size sheets once	  <p>*After the first sheet is printed, the ribbon is rewound, and the second and following sheets are printed. Furthermore, after the third sheet is printed, the ribbon is rewound and adjusted to the next print position.</p>	 <p>*For the second and third sheets, two sheets are printed at the same time in a multiple layout.</p>

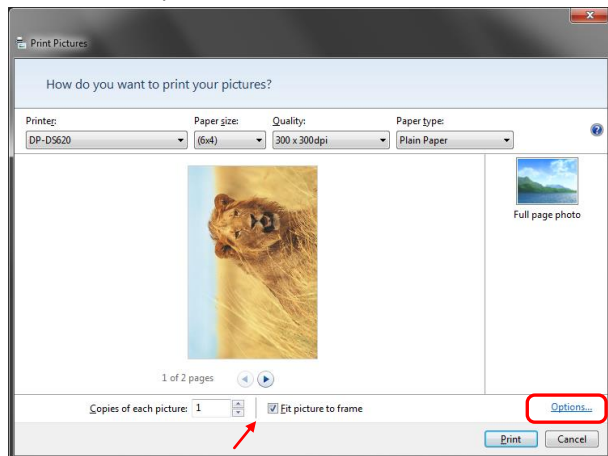

< Application usage example >
